offered for sale by the innvented by an old cotton planter, and we feel safe n saying it is the best imdement ever off-red to the South. This Machine conculars and works as follows: Harrows the bed or ridge, and opens the fur row, and drops the seed, and covers them up; thus completing the whole of the work at one going over, and saves the labor of four men and three four men and thre orses; and does the work much nicer than can b done in the usual way

ould be used in the usual way of sowing. Remember seed is worth 30 cents per bushel." This Machine is also an elegant Cultivator, after the Cotton is up. The front plow, hopper, and covering block may all be removed, and Scrapers screwed on. And then you scrape both sides of the row, and harrow the ground, and plow the cotton, if necessary, all at once, thus saving the labor of at least 5 or 6 hands. The above Machines can be got up at a cost of not over eleven dollars, and can be sold in the South for \$ 5 or \$30 as ast as they could be manufacture! or shipped there. Do not let anything prevent you making an investigation of our Cotton Planter. We challenge the wor'd to show a better or more labor saving and useful implement for the purpose ecommended. The first objection is yet got to be set up against it.

A small model of our Planter may be seen at the Sewance Hou c, College street, Nashville. We have set the Fatent Fight of this Machine at 2 % cents on the bale of cotton produced of any State. Reference being had to the Statistic We can be seen at the Sewance House at present. After a few days, address JUSTICE & GALBREATH,
